Presentation guidelines

Oral presentations

In order to facilitate all the different formats of multimedia and operating systems that are being used for presentations, the organizing committee has decided that all talks must be delivered by the presenters' own laptops, instead of being uploaded with a fixed format to an internal system.

There will be a toggle-connector system in each room (both VGA and HDMI) to connect to the projecting screen, similar to other large meeting formats, e.g. APS March Meeting.

The presentation format is power point (16:9) as well as 4:3 (but in this case the full screen will not be used). The presentation should be 13+2 type (13 for the talk and 2 for questions). The talk cannot go beyond 14 minutes. Speakers should arrive at the meeting room at least 10 minutes before the session commences to meet the chairperson. At that time or any other opportunity prior to that, they should test their connections to the system to be certain it works. Speakers are responsible for bringing their own adaptor to the VGA or HDMI ports if their laptops require them, although we will try to have some around for emergencies. There will be technicians available to support speakers.

In case you still need further information please do not hesitate to contact Lisa Schneider, lisa.schneider@wikonect.de

Poster presentations

Posters will be on display in the Nordfoyer and Westfoyer with three dedicated poster sessions as scheduled in the program (A, B and C). During poster sessions, presenting authors are asked to stand close to their boards to answer questions and facilitate discussions on their work.
